

29029 Whistler Women's Team App

UI / UX Specification v1

Product Type

Private iPhone-first web app for 10 women participating in 29029 Whistler.

The app is a shared situational-awareness board.

It should not feel like a race tracker, leaderboard, Garmin app, or Strava app.

It should feel calm, warm, supportive, and extremely easy to use while tired.

Core UX Principle

Every important action should take less than 5 seconds.

No typing during the event.

No predictions.

No ETA.

No pace.

No push notifications.

No completion forecasting.

Only show:

- current status
 - current ascent
 - completed ascents
 - status timestamp
 - recovery completion
 - self-reported "starting soon" intent
-

Athletes

Create these 10 athlete profiles:

- Taryn
- Eve
- Jessica
- Liz
- Andrea
- Greta
- Heather
- Rebecca
- Samantha
- Vivian

Each athlete must have:

- name
- circular profile photo
- current status
- completed ascent count
- current ascent number
- last updated timestamp
- starting soon value
- recovery checklist state

Use placeholder profile images until real photos are uploaded.

Visual Design System

Colors

Background:

- Warm cream: #F8F3EA

Primary:

- Deep burgundy: #7A1E2C

Text:

- Charcoal: #2B2B2B

Secondary text:

- Warm gray: #7C746B

Card background:

- Soft white: #FFFDF8

Border:

- Light tan: #E6DCCD

Success:

- Forest green: #2F6B4F

Warning:

- Golden amber: #C9972B

Urgent:

- Deep red: #B3261E

Inactive:

- Pale taupe: #D8CEC0

Typography

Use a clean sans-serif system font.

Recommended:

- Inter, SF Pro, or system default

Font sizes:

- App title: 24px, bold
- Section header: 18px, bold
- Athlete name: 18px, bold
- Status: 16px, semibold
- Detail text: 14px
- Timestamp: 13px
- Button text: 17px, semibold

Spacing

Mobile-first layout.

Page padding:

- 16px

Card padding:

- 16px

Card radius:

- 18px

Card gap:

- 12px

Button height:

- Minimum 54px

Touch targets:

- Minimum 48px height

Status Values

Allowed statuses:

1. Starting Soon
2. Climbing
3. Summit
4. Eating at Top
5. Gondola Down
6. Recovery
7. Eating at Bottom
8. Sleeping
9. Finished
10. Need Help

Each athlete can only have one current status.

When status changes:

- status updates immediately
 - timestamp updates immediately
 - no confirmation modal
 - return user to prior screen
-

Starting Soon Values

Separate from status.

Options:

- None
- Starting Now
- Starting Within 10 Minutes
- Starting Within 30 Minutes

This is an intentional self-reported signal.

Do not calculate or infer this.

Display only when selected.

Completed Ascents Visual

Show 8 small mountain triangles for every athlete.

Filled triangle = completed ascent.

Empty triangle = remaining ascent.

Example:

Rules:

- Always show 8 total triangles
- Filled triangles equal completed ascent count
- Use burgundy for filled
- Use pale taupe for empty

- Keep triangles visually small and scannable
 - Also include numeric text when space allows: 3 completed
-

Bottom Navigation

Fixed bottom tab bar.

Tabs:

1. Team
2. Me
3. Status
4. Recovery
5. Family

Active tab:

- Burgundy icon/text
- Bold

Inactive tab:

- Warm gray
-

Screen 1: Team Board

Purpose

Answer instantly:

“Where is everyone right now?”

Header

Top of screen:

29029 Whistler

Subtitle:

10 women on the mountain

Optional small line:

Updated live

Layout

Vertical scroll list of athlete cards.

Each card includes:

- circular photo
- athlete name
- status
- ascent visual triangles
- current ascent text
- last updated timestamp
- starting soon chip if selected

Athlete Card Layout

Example:

Taryn
Climbing
▲▲△△△△△
Ascent 3 · 2 completed
Updated 3 min ago

If starting soon:

Jessica
Eating at Bottom
▲▲▲△△△△
Ascent 4 · 3 completed
Starting Within 10 Minutes
Updated just now

Card Styling

Default card:

- white background
- tan border
- rounded corners

Need Help card:

- light red tint background
- deep red border
- status text in urgent red
- no banner
- no push notification

Finished card:

- slightly muted background
- show all 8 triangles filled
- status `Finished`

Sleeping card:

- normal card
- subdued status color

Sort Order

Sort athlete cards by status:

1. Need Help
2. Climbing
3. Summit
4. Eating at Top
5. Gondola Down
6. Recovery
7. Eating at Bottom
8. Starting Soon
9. Sleeping
10. Finished

Within each status group:

- most recently updated first

Tap Behavior

Tap athlete card → Athlete Detail screen.

Screen 2: My Dashboard

Purpose

Let the current athlete update herself quickly.

Header

Hi, Taryn

Subtitle:

One ascent at a time.

Main Card

Show:

- profile photo
- current status
- completed ascent triangles
- completed ascent count
- current ascent number
- last updated timestamp
- starting soon status if active

Example:

Current Status

Climbing

▲▲△△△△△△

2 completed

Current Ascent

3

Updated

3 min ago

Primary Buttons

Large stacked buttons:

1. Update Status
2. Update Ascents
3. Planning Another Ascent
4. Recovery Checklist

Button style:

- Primary burgundy for Update Status
 - Secondary cream/outline for others
-

Screen 3: Update Status

Purpose

One-tap status update.

Header

What are you doing right now?

Subtext:

Tap once to update your team.

Layout

Large tile buttons in single column.

Button order:

1. Starting Soon
2. Climbing
3. Summit
4. Eating at Top
5. Gondola Down
6. Recovery
7. Eating at Bottom
8. Sleeping
9. Finished

10. Need Help

Each button:

- 56px minimum height
- rounded corners
- large text
- optional small icon
- high contrast

Behavior

On tap:

- save status
- update status timestamp
- if status is Finished, set completed ascents to 8
- return to My Dashboard
- show small toast: `Status updated`

No confirmation.

Exception:

- For Finished, show confirmation: `Mark event finished?`
- Buttons: `Cancel` and `Yes, Finished`

Need Help:

- no confirmation
- updates immediately
- card styling changes on Team Board

Screen 4: Update Ascents

Purpose

Manually track ascent completion.

Header

`Ascents`

Display

Show:

Completed Ascents

Large number: 2

Triangles: ▲▲△△△△△△

Show:

Current Ascent

Large number: 3

Buttons

Primary: + Mark Current Ascent Complete

Secondary: Undo Last Ascent

Mark Complete Behavior

When tapped:

- completedAscents increases by 1
- currentAscent increases by 1
- status becomes Summit
- status timestamp updates
- recoveryComplete becomes false
- show toast: Ascent 3 completed

If completedAscents reaches 8:

- status becomes Finished
- currentAscent remains 8
- all triangles filled

Undo Behavior

When tapped:

- ask confirmation: Undo last completed ascent?
- if confirmed:

- completedAscents decreases by 1
 - currentAscent becomes completedAscents + 1
 - timestamp updates
-

Screen 5: Planning Another Ascent

Purpose

Let teammates know intentional start timing.

Header

Planning another ascent?

Subtext:

Only set this if you want others to know you may start soon.

Options

Large buttons:

1. Starting Now
2. Starting Within 10 Minutes
3. Starting Within 30 Minutes
4. Clear Starting Soon

Behavior

On tap:

- save startingSoon value
- update timestamp
- return to My Dashboard
- show chip on Team Board

Important: This is not a prediction. This is self-reported intent.

Screen 6: Recovery Checklist

Purpose

Simple accountability after each ascent.

Header

Recovery Check

Subtext:

Before your next ascent.

Checklist

Checkboxes:

- Refilled water
- Took electrolytes
- Ate fuel
- Bathroom / reset
- Ready for next ascent

Button

Complete Recovery

Behavior

If all checked:

- recoveryComplete = true
- show green success state: Recovery complete

If not all checked:

- allow save as incomplete
- recoveryComplete = false
- show yellow state: Recovery incomplete

Recovery completion visible only to athletes and crew/admin.

Do not show recovery details in Family View.

Screen 7: Athlete Detail

Purpose

View another athlete's current status.

Display

Show:

- profile photo
- name
- current status
- completed ascent triangles
- completed ascent count
- current ascent
- last updated timestamp
- starting soon chip if active
- recovery status if viewer is athlete/admin

Example:

Rebecca

Eating at Bottom

▲▲▲▲△△△△
4 completed

Current Ascent
5

Updated
7 min ago

Recovery
Complete

Starting Soon
None

Buttons

If viewing self:

- Update Status
- Planning Another Ascent
- Recovery Checklist

If viewing another athlete:

- no edit buttons unless admin
-

Screen 8: Family View

Purpose

Read-only progress for family/friends.

Access

Shared link.

No login required.

Header

29029 Whistler

Subtitle:

Follow the team

Athlete Cards

Each card shows:

- photo
- name
- current status
- completed ascent triangles
- completed ascents
- current ascent
- last updated timestamp

Do not show:

- Recovery checklist
- Need Help history
- Admin tools
- private notes
- pacing
- ETA
- projected finish

Need Help:

- show only as current status if active
 - no special banner
-

Empty States

No Starting Soon

Text:

No one has marked that they are starting soon.

Everyone Sleeping

Text:

The team is resting.

Everyone Finished

Text:

All ascents complete.

No Internet

Text:

You're offline. Updates will sync when connection returns.

Interaction Rules

Do:

- save immediately
- show timestamps everywhere
- make buttons large
- use plain language
- prioritize current status

Do not:

- show ETA
 - show pace
 - show projected finish
 - rank athletes
 - create leaderboards
 - send push notifications
 - require typing
 - make the athlete confirm routine status changes
-

Replit Build Instructions

Build the app as a mobile-first responsive web application.

Recommended stack:

- React or Next.js
- Tailwind CSS
- Supabase for database and real-time updates

The app should support:

- seeded athlete profiles
- manual status updates
- manual ascent updates
- recovery checklist
- starting soon signal
- read-only family link
- live team board updates

Prioritize:

- speed
- clarity

- reliability
- simple one-handed iPhone use

Do not build:

- GPS tracking
- Apple Watch app
- pace calculations
- ETA calculations
- projected finish time
- push notifications
- public user accounts
- social feed
